

## Software Engineer (m/f/d) Fulltime

emarketing is a tech company that helps merchants to discover and leverage their full potential. Our solution is tailored to large as well to small merchants from all over the world. To ensure uniqueness and scalability we are continuously extending and improving our product. In 2016 emarketing has been officially awarded as the fast growing Google Partner in EMEA.

### Where Your Expertise Is Needed

- developing high-quality web applications
- analyze and maintain existing software applications
- designing and implementing highly scaleable, testable code
- discover and work with ecommerce APIs (Google Ads, Facebook, Amazon)
- fix programming bugs
- work on improvements of CI & CD processes

### What Are We Looking For

- bachelor's degree or equivalent experience in computer science
- 3+ years experience in the development of (web) applications
- tech stack: TypeScript (Angular/Node), Vue.js and Ruby
- familiarity with cloud infrastructures (e.g. GCP or AWS)
- good command of software design and code patterns
- knowledge of structured databases and unstructured data

### Your Advantages With Us

- competitive salary
- work-life balance
- daily fresh food for employees
- a young and motivated team
- modern equipment

Please be aware that this position is inhouse only. If you have any questions regarding the position or the recruitment process, please do not hesitate to send us an e-mail.
